**Orient**

Made from 100% polyester, in 4 designs across 3 colorways

# Travel in style with Orient

Orient is a collection of lightweight polyester fabrics including three abstract patterns and one plain, available in three classic colorways of blue, red and grey. The patterned fabrics incorporate a textured yarn to give a three dimensional appearance. With trend focused colors, the fabrics hold a contemporary look and soft finish while retaining durability and performance.

A classic polyester moquette offering a lighter weight alternative to wool, Orient features futuristic inspired designs which coordinate with the plain, or alternatively work alongside leather and vinyl to bring any bus or motorcoach interior to life.

Orient is a face to face moquette, woven on a jacquard loom using a standard polyester yarn and a Knit-de-Knit (KDK) polyester yarn. The crinkled effect of the KDK yarn provides depth to the finished fabric, giving flexibility in color, pattern and texture.

## Designed by Samantha Daniels

Samantha joined Camira in 2009 after studying a BSc (Hons) in Textile Design, gaining experience in our Technical Laboratory and Sample Centre before moving into Product Design and Development. Working across Contract, Transport and Healthcare Samantha has developed fabrics such as Main Line Flax, Track and Trail.

Now focusing on our Transport fabrics, Samantha has designed patterns for Fusion, worked on the recolor of our Classic leather and her latest project has been the design direction and development for Orient.
