YI110 Murphy	YI363 Broadway	YI390 Chrysler
YI113 Lexington	YI364 Bronx	
YI157 Watts	YI365 Ellis	
YI160 Leroy	YI380 Houston	
YI173 Varick	YI381 Soho	

A simple guide to using your Revit Ready file.

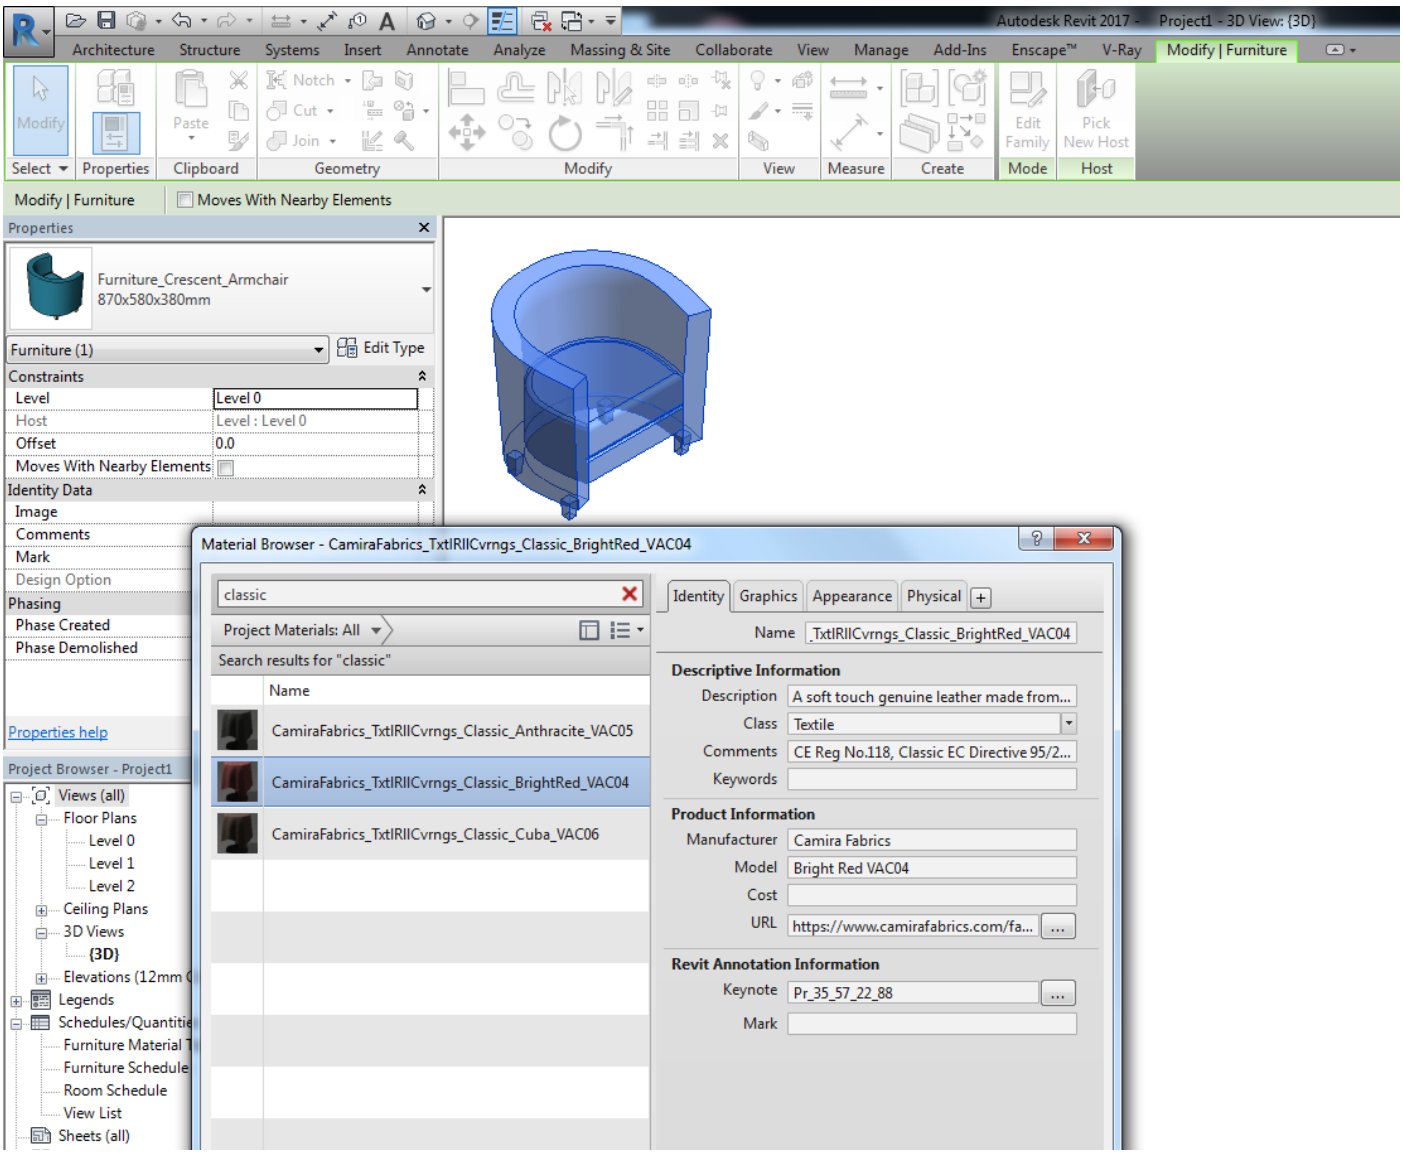

1. LOAD IT

This fabric range is created in a Revit Project containing multiple finishes. Open the RVT file, click the sample or samples you wish to transfer to your project then click ‘copy to clipboard’. Open your active project and click ‘paste’, the selected materials and its data will now be available.

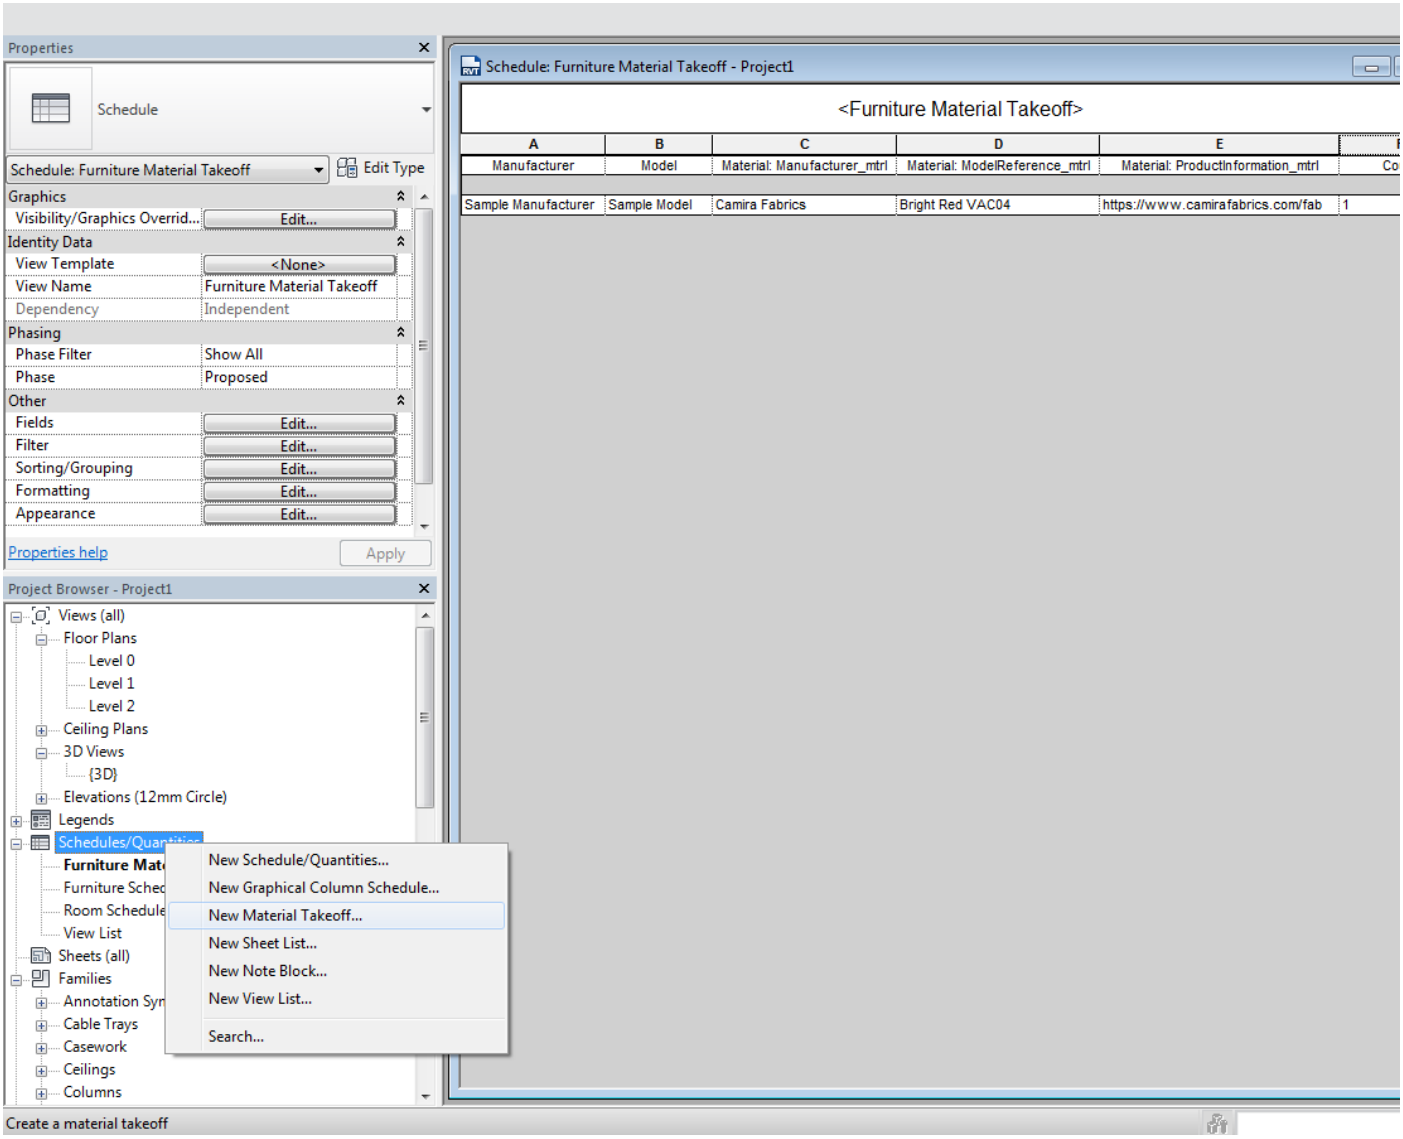

2. USE IT

Click an item with a material parameter and open the material browser via this parameter. Search the desired fabric range, single click the sample for the data to appear and double check to activate.

3. SCHEDULE IT

Creating a ‘Material Takeoff’ by right clicking ‘Schedules/Quantities’ will provide an itemised list of fabrics including information such as where they is applied and an URL directing to the sample.

Additional information

This component has been created by Diane Butterworth Ltd following the manufacturer’s specification.

We hope our Revit files are a helpful tool in space planning and visualisation. We take care in ensuring all dimensions and features match manufacturer’s literature, however actual product may vary slightly.

We would love to hear from you if you have any questions or feedback, please email hello@dianebutterworth.com

Thank you for using this BIM file,

Db Diane Butterworth
