Monochrome Set II

Made from 75% Pure New Wool, 25% Flax, in 10 designs

Effortlessly elevated

camira

www.camirafabrics.com

An evolution of Camira's popular Monochrome Sett, Monochrome Sett II introduces a sophisticated palette of warm neutrals, enriching one of our most celebrated collections. Woven from the same blend of pure new wool and flax, the collection retains its signature character while offering a grounded, contemporary expression of color.

Depth and Dimension

Building on the tailoring-inspired aesthetics of the original, Monochrome Sett II blends refined stripes, classic checks, and houndstooth with bold basket weaves and graphic micro-patterns. The interplay of design & scale, adds visual depth and modern rhythm, allowing patterns to work harmoniously together or make a standalone statement.

Quiet Confidence

Understated yet impactful, the collection delivers a cohesive aesthetic that enhances interior spaces without dominating. Carefully curated caramel tones create a sense of calm and balance for interior spaces bringing a quiet sophistication to workplace, hospitality, and residential settings.

Stylishly Sustainable

Part of Camira's environmental portfolio, Monochrome Sett II is woven from renewable wool and flax yarns, which are biodegradable. Inherently flame retardant with no added chemicals, the fabric meets key flammability standards, offering a responsible choice, with low impact without compromising style or performance. Rooted in regeneration, durability, and versatility, aligning with a growing demand for circular, low-impact materials.

At a glance

- Warm-neutral palette with caramel hues
- Interplay of patterns and scale
- Sustainable by design
- Multi-application fabric
- Inherently flame retardant
- Complements existing Camira collections
