

Recycled Polyester Fabrics

From plastic bottles to marine plastic waste, we give plastics a new lease of life as environmental upholstery fabrics

camira

Reducing, reusing and recycling for over 20 years

From the creation of our very first recycled polyester fabric in 1997, through to the 2020 launch of Oceanic – our first textile to include marine plastic waste – our commitment to creating beautiful fabrics, without damaging the world around us, is long and enduring.

With a commitment to pushing the boundaries of environmental design, we have developed industry-leading textile innovations that deliver the aesthetics and durability our customers require – whilst always working towards achieving our ambition of a sustainable textile landscape.

Minimising our impact on the environment, and pioneering a new approach to plastic, this collection of eco-conscious textiles is one of our proudest achievements.
