The Lumis Collection

The light between

The Lumis Collection explores the architecture of light between people, spaces, and time. Designed to shape interiors with soft poise, Astro, Nova, and Halo are wide-width sheer fabrics crafted from recycled polyester, illuminating environments through filtered light and layered transparency.

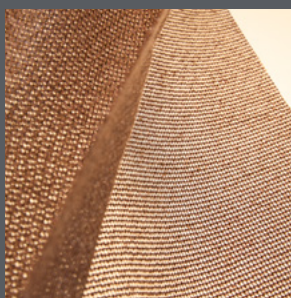

Shaping light and space

Rooted in the Latin lumen, meaning light, Lumis is presented in a variety of textures, weights, and transparencies. The collection is designed for workplace and hospitality settings, where wellbeing, focus, and productivity are paramount.

Cultivating calm

Ethereal and lightweight, the fabrics float within a space, creating interiors that are at once architectural and atmospheric. They offer subtle definition while remaining visually restrained. Soft, diffused, and fluid, Lumis forms moments of openness and repose allowing light and space to breathe, and cultivating calm, layered environments.

Textiles with character

Each textile in the Lumis Collection is presented in nine curated colourways and carries its own distinct character. Astro embodies refined, linen-like sophistication, Halo conveys a silky luminosity with a smooth, fluid drape and Nova offers soft, organic bouclé texture, radiating tactile warmth

Designed for Harmony

Curated to connect with Camira's wider portfolio, Lumis pairs seamlessly with upholstery and acoustic ranges, enabling layered, cohesive interior schemes. Generously wide sheers make specification simple, practical, and efficient, while maintaining elegance and versatility.

At a glance

- **Three wide-width sheers: Astro, Halo, Nova**
- **Nine curated colourways in each fabric range**
- **Acoustic properties**
- **Marries seamlessly to other Camira fabrics**
- **Contains recycled polyester**
- **Certified to Indoor Advantage Gold and Oeko-Tex Standard 10**
