Please note: the stated technical and environmental performance of a fabric may be affected by the post treatment applied. The technical parameters, including flammability, outlined in our internal specifications provide a guide to fabric performance and unless specified, are tested by Camira without a post treatment. We recommend that customers conduct their own testing on final finished components, including but not limited to flammability performance, in the intended format for end installation. Product guarantees for the post treatment of fabrics undertaken by Camira are guaranteed for 5 years.

There is a 5 yards minimum order quantity per colorway and a potential working gain or loss of 10% in finished length unless otherwise indicated. Please allow 10 working days for the above treatments. We are unable to accept cancellation for orders where a post treatment has been requested. With the addition of any post treatment or backing the technical performance, the shade of the product may be altered. Please contact our customer services department for further information.
