Replay Zero

Made from

Face: 100% Post Consumer Recycled Polyester, Backing (Eco FR): 100% FR Coated Viscose

Journey to Zero

Woven from **100% post-consumer recycled polyester**, RePlay Zero transforms discarded plastic bottles into a high-performance upholstery fabric for bus and coach interiors. Combining recycled materials, contemporary design and advanced flame-retardant protection, it supports a more sustainable approach to transport interiors.

Recycled, reimagined

Made entirely from recycled plastic bottles, RePlay Zero helps reduce waste and lower reliance on virgin petrochemical resources.

Every linear metre contains approximately **27 recycled bottles** and saves around **1kg CO₂e**, delivering an estimated **34% reduction in embodied carbon** compared with an equivalent virgin polyester upholstery fabric.

From bottle to bus

Sustainability and style in motion

Available in 20 colorways, RePlay Zero features subtle texture, layered color and refined two-tone detailing. Durable and versatile, it's designed for modern transport interiors.

Engineered with EcoFR

Powered by Camira's **patent-pending EcoFR technology**, RePlay Zero combines halogen-free flame-retardant protection with a lightweight non-woven backing.

The result is a high-performance fabric that meets key European transport fire standards while delivering durability, comfort and contemporary design.
